### Get to know the new Blower Door World Record-Maker

---

Highly motivated and with a big goal in mind, the team of Office of Energy „q50“ and CEO Christian Rösemeier have started the year 2013. Their expectations were exceeded. With the Blower Door Test at a warehouse of the huge Online-Shop Zalando in Erfurt, Christian Rösemeier gets his desired entry into the Guinness Book of World Records.

Christian Rösemeier and his team measured a building volume of 1.346,745 cubic meters. Just nine hours have taken the Blower Door Test – installation and disassembly included. The jury of Guinness World Records in London have certified the Office of Energy „Q50“ with the title „The largest Blower Door Test“.

Now Office of Energy „q50“ sets up a new website for the brandnew World Record. At [www.blower-door-world-record.com](http://www.blower-door-world-record.com) are all interesting facts about the whole Blower Door and its team. Photos and videos are supplementing the website. With a few clicks the visitors get in touch with Christian Rösemeier and his team, and the Blower Door Test, of course.

-End-
